The Cheviot is a compact climbing and sliding unit from our Mountain Range, designed to keep children active through a variety of physical challenges. Featuring a slide, spiral climber, overhead ladder, and multiple climbing routes, it helps develop strength, coordination, and confidence while encouraging exploration and movement. Its versatile design delivers plenty of play value within a space-efficient footprint.

Our modular play system allows components to be mixed and matched to create the ideal play solution for each site. Platforms, slides, climbers, bridges, tunnels and play panels can be combined in countless configurations, enabling designs to be tailored to available space, budget, age range and community needs. Inclusivity is considered throughout the range, with a variety of accessible and sensory-rich play features available that can be seamlessly incorporated into designs to further enhance play opportunities for children of all abilities. This flexible approach ensures every playground delivers maximum play value while creating a unique and engaging environment for its users.
